

Corporate Overview

For over twenty years, Jeff Hojnacki has been helping large financial and insurance institutions design, develop, and support demanding software applications on mainframe, distributed, middleware, and PC-based computing platforms. With his broad skillset, he contributed to the success of several of the world's most scalable internet banking sites which support millions of users. Jeff established Arisin Software Corporation in 2004 with the focus to help small to medium sized businesses with their systems integration solutions. Today, Jeff and Arisin Software Corporation want to work with your team to solve your complex application integration problems.

Highlights

Over 20 years of Information Technology experience

Member of the Global Integration Consortium.

Professional Alliances with Middletech Corporation and Boundless Flight, Inc.

Experienced with Web Services, EAI, and Service Oriented Architectures

Experienced with Websphere and .NET Programming environments

Experienced with TCP/IP and SNA networks for real-time connectivity to CICS

Patent 6,119,104

WebSphere, OS/390, CICS, MQ Series, and IBM Communications Server are registered trademarks of International Business Machines.

Windows, Visual Studio, Visual Basic, and .NET are registered trademarks of Microsoft Corporation.

All other company, service and product names are trademarks or registered trademarks of their respective companies.

Professional Services

Application Integration, Architecture, and Seminars

We are able to design scalable solutions to integrate your applications using the latest technologies available from IBM, Microsoft, and other middleware companies. We can help you evaluate the differences between .NET and Websphere, and more importantly, design an application architecture that works for your environment. If you want to do it yourself, we can add value with our **Application Integration Seminar**. We will address critical issues for your company to consider so that you can be successful designing long term integration strategies for your company.

Middleware Consulting

Operating Platforms: Windows, OS/390, and CICS

Middleware Products: MQ Series, IBM Communications Server, Attachmate Architectures: Web Services, Enterprise Architecture Infrastructure (EAI) and Service Oriented Architectures (SOA), Enterprise Service Bus (ESB)

Networks: SNA and TCP/IP

Custom Programming

Do you have a new idea? We can create new software for your business, and we are skilled in the following technologies:

Microsoft .NET (C#, VB.NET, ASP.NET, and SQL Server)

Microsoft Visual Studio 6.0 (Visual Basic and C++)

IBM Websphere (Java, MQ JMS, JDBC and more)

IBM Mainframe (CICS, DB2, COBOL, Batch, and more)

Load Testing

It takes careful planning to setup a series of benchmarks and load tests for each physical and logical layer of your application. We will help to ensure that your application is able to perform efficiently under heavy load by guiding the process to design tests, monitor results, interpret results, debug and fix, and present findings to management.

Project Management and Process Improvement

We are pleased to provide project management services for your business. We are able to analyze your business process and make improvements to it by developing automation technology specific to your application.
